Subject: Brian Frank called 4:15 wanting to get background on two patients today

██████ -regarding issues related to Pt transport into Cty - (I was unavailable to call him back until after a meeting he had regarding the case)

12010 -regarding dates of 11/05/17 - (it was not a case i was ever involved in, but relayed that the Pt was placed on MHW15 due to high BDI and risk factors - when nursing met with him about this and consulted with medical provider).

Brian wanted clarification about the difference between a mental health watch and suicide watch and I described it has been my understanding that since before i arrived here, the Jail administration has not wanted the term "suicide watch" used because it is confusing for cases which are not suicidal (actually, we have previously had this discussion) and we were informed to call the watches "mental health watches." We briefly discussed that many of the mental health watches we place inmates on are proactive and not after or subsequent to a suicide gesture or suicide statement. And many of the mental health watches we start are related to poorly regulated coping and vulnerability to act-out or be taken advantage of... This info seemed to suffice but i thought i would relay the information and the call as i suspect both questions are related to legal issues.

PS - i viewed this as simply confirming fact data about known information and dates which would have been shared in the placing him on MHW. Nothing new or different was shared - but upon reflection, it seems important to know.
